HIGHLY SECURED CLOUD SOLUTION

GET SHIELDQ FOR AFFORDABLE, INSTANT COMPLIANCE.

Place your trust in ShieldQ, the cloud-based, PCI DSS-accredited, ISO 27001-certified platform, that lets you accept and store faxes, emails, web forms and uploads containing confidential information and personally identifiable information into a centralized, secured repository. You have the ability to integrate ShieldQ with legacy CRM and practice management software solutions.

Hackers are now aggressively targeting law firms' data. From property agreements to employment contracts, law firms have a lot of valuable information which hackers could exploit.

According to the Law Firm Cybersecurity Scorecard report, "40% of surveyed law firms had experienced a data breach in 2016 and did not know about it".

But clients of Law firms and businesses expect absolute confidentiality. They also expect highly secure communications, with limited access to personal files.

Law firms of any size can count on cloud-based ShieldQ. This affordable, ISO 27001-certified, PCI DSS-accredited document management and storage platform to offer the highest level of secure communications and storage for faxes, forms, uploads and emails.

This is crucial to protect sensitive data and the company's brand reputation. InterFax is not only GDPR and PCI compliant, but has also acquired ISO 27001 certification to ensure the highest level of data protection.
