InterFAX
Let the internet do your faxing

HIGHLY SECURED FAXING SOLUTION
LET THE INTERNET DO YOUR FAXING

InterFAX is an online service for sending and receiving faxes. InterFAX offers a robust network of servers to allow customers to send faxes to any location around the world and to receive faxes in a variety of countries.

Email-to-Fax / Fax-to-Email

Inbound and outbound fax services: send, receive and store faxes online saving time and money

24/7 support: support in your local language and we reply to all email requests within one business day

High capacity: our servers can handle large volumes of faxes at any given moment

No software and hardware setup: easy deployment, quick implementation

Security

Our fax service supports public key signature and encryption of inbound and outbound faxes using mechanisms and data encryption options such as: Https with TLS, Secure tunnels (VPN), SMTP over TLS, S/MIME, deletion of data after completion.

Fax API

Integrate our service with any development environment through our free Fax API.

- **SOAP Fax API**
  Send faxes from .NET or any other SOAP client

- **REST Fax API**
  Send faxes via any standard HTTP library such as cURL

- **SMTP**
  Send faxes via any standard email library; client program

PCI-DSS
COMPLIANT

We've achieved our Attestation of Compliance from an approved quality security assessor for the highest PCI-DSS accreditation: Level 1

GDPR
READY

InterFax is EU General Data Protection (GDPR)-ready, routing customers personal data within EU boundaries (or any authorized country).

ISO 27001
CERTIFIED

Interfax is Certification Europe-approved for ISO 27001.

HIPAA
COMPLIANT

Medical records protection concerns patients and providers. They have three security levels for HIPAA-compliant faxing: technical, physical and procedural.

About us

InterFAX has been offering computer-based faxing services since 1996. Initially a fax-on-demand service, the company went on to offer fax broadcasting, and in 1999 launched an Internet faxing system with send and receive capability. The system is built to send and receive thousands of faxes per hour, and can accommodate any size request – from occasional single-recipient faxing to mass distribution. InterFAX serves tens of thousands of users, who send and receive over 60 million pages a year.
